

## Explanation of the Remarks

◎	Fit with no problem.
◎ (※12)	Please put the middle seat out, move the side seat a little bit inside so that you can avoid the child seat being disturbed by the door when it is in the flat position.
◎ (※14)	Please put the leg support at the longest position and use the plinth at the upright position.
◎ (※2)	When using in rear-facing position the space of the passenger front seat is narrow.
※3	The Euro Turn can not be used in this type of car.
※4	The Euro Turn can not be used in this type of car, because of the centre table of the backseat
Δ4	The Euro Turn can not be used in the flat position in this car as the carbelt is too short. (Minimum length of the belt should be 2.25m)
Δ5	If the belt is going from the inside to the outside the Euro Turn can not be used in the flat position
× 2	Since you cannot use the leg support in a proper length, you cannot fit the child seat in this model.
× 3	Since you cannot move the front seat of this car you cannot fix the child seat in the rear facing position.
× 6	Since the car has rear seat underbox, the Euro Turn can not be safely attached.
× 7	Due to the floor board of the car you cannot fix the child seat for this model.
× 10	Because of the shape of the seat the Euro Turn can not be installed in this car type.
×11	There is not enough space to fix the Euro Turn in the car.
×12	The second row in the car can not be fixed when the car seat is installed.
× 1 5	You can not use the flat position because the door can not be closed.
×16	You cannot fit the child seat because there is no rear seat in this model.
× 2 1	Since only a part of the leg support is touching the floor the Euro Turn can not be safely installed.
× 2 4	Due to the under floor box you cannot fit the child seat in this model.
× 2 5	Due to the stow'n go system you cannot fit the child seat in this model.
